**Maryland based company, Convergence Technology Consulting –
One of first in United States to achieves top Microsoft virtualization specialization certification**

Glen Burnie, M.D., April 6, 2009 – Convergence Technology Consulting, a network engineering integration firm, is an expert in infrastructure technologies from Microsoft, Citrix, and VMware as well as an expertise in enterprise storage (Netapp, Lefthand Networks (HP), Dell/EqualLogic). Today, Convergence Technology Consulting is proud to announce that we are one of the first companies in the United States to achieve Microsoft's Virtualization Specialization certification under the Advanced Infrastructure Competency.

By achieving this top level certification, Convergence Technology Consulting is the only company in the United States holding the highest partnership status, in Virtualization, with Microsoft, Citrix and VMware. We are a Microsoft Gold Authorized Reseller, a Citrix Platinum Solution Advisor and a VMware Premier Partner. "There is no doubt that Convergence has and continues to be a committed leader in the Virtualization space," says Phil Ernst, CEO/CTO of Convergence Technology Consulting. "We feel privileged Microsoft asked us to be one of the first companies to go through the approval process. Convergence firmly believes that stronger competition in the virtualization space drives innovation and brings greater value to our clients." Larry Letow, President of Convergence added, "Our customers see the value working with Convergence, an organization that has close relationships with the three top virtualization companies in the world."

Convergence Technology Consulting is a technologically centric organization. From the inception of our engagements to solution delivery to documentation and training, our focus never changes from meeting our client's requirements and allowing their organization to remain as self-reliant as needed. Convergence works with clients ranging in size from the small and

medium size business to Fortune 100 Enterprise in both the private and government sectors. Our staff of cleared Consulting Engineers has the credentials to access most secured facilities.
